

off-grid, easy installation

844006024819

- 20W is comparable to 150W HID
- All-in-one design, the solar panel and battery are built right into the LED fixture
- No need for trenching or wiring, this fixture does not connect to any power feed
- Perfect for signage, billboards, advertisements and walls
- 4 hours of 100% brightness, then 25% remainder of night with one charge
- Li-lon battery lasts at least 1500 charge cycles and is replaceable

ACCESSORY PART #	UPC	DESCRIPTION				

IMPORTANT OPERATING TEMPERATURE INFORMATION The working temperature of the solar fixture is  $-4^{\circ}$ F ( $-20^{\circ}$ C) to  $+140^{\circ}$ F ( $+60^{\circ}$ C). When operating in an environment with a temperature lower than 32°F ( $0^{\circ}$ C) or  $>149^{\circ}$ F ( $65^{\circ}$ C) the battery will stop charging, even if there is sunlight. In that temperature range the battery self protects and will not be damaged. The solar display light will still light even in those extreme temperatures until the battery is depleted.

7.5" long arm bracket
