IMPORTANT OPERATING TEMPERATURE INFORMATION The working temperature of the solar fixture is -4°F (-20°C) to +140°F (+60°C). When operating in an environment with a temperature lower than 32°F (0°C) or >113°F (45°C) the battery will stop charging, even if there is sunlight. In that temperature range the battery self protects and will not be damaged. The solar flood light fixture will still light even in those extreme temperatures until the battery is depleted.

RoHS Compliant C E FC
