

LED-SPT LED SOLAR POST TOP FIXTURE | ALL-IN-ONE DESIGN

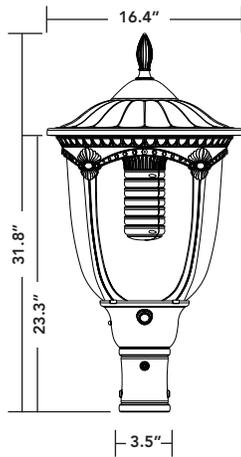

off-grid, easy installation

angled top prevents debris to build up

two 240° motion sensors

- 20W is comparable to 150W HID
- All-in-one design, the solar panel and battery are built right into the LED fixture
- No need for trenching or wiring, this fixture does not connect to any power feed
- Perfect for greenspace and greenway lighting, parks, parking lots, transit shelters and stops
- Long life battery lasts three nights with a one day charge
- Fixture turns on at night automatically and can be set to different operating modes (see installation instructions for details)
- Advanced new LiFePO4 battery lasts at least 2000 charge cycles and is replaceable

PART #	UPC	COMPARABLE TO	WATTAGE	LUMENS	CCT (K)	WEIGHT

IMPORTANT OPERATING TEMPERATURE INFORMATION The working temperature of the solar fixture is -4°F (-20°C) to +149°F (+65°C). When operating in an environment with a temperature lower than 32°F (0°C) or >149°F (65°C) the battery will stop charging, even if there is sunlight. In that temperature range the battery self protects and will not be damaged. The solar post top fixture will still light even in those extreme temperatures until the battery is depleted.
